Haystax

Haystax for Critical Infrastructure
Total Awareness. Shared Intelligence. Coordinated Action.

From power grids and water treatment facilities to transportation hubs and public venues, critical infrastructure keeps our society running. But these vital systems are increasingly vulnerable—targeted by bad actors, exposed to climate events, and strained by legacy security tools that aren't interoperable. **Haystax by Secure Passage** brings order to the chaos—integrating asset, incident, and threat intelligence into one powerful, mission-driven platform. Built for those who serve on the front lines of public safety, Haystax delivers operational clarity when and where it matters most.

The Challenge

Critical infrastructure is the backbone of our nation's safety, economy, and way of life—and it's under constant threat. Yet many safety practitioners still operate with hardcopy data, siloed security tools, and little coordination outside of jurisdictions running a 24x7 emergency operations center.
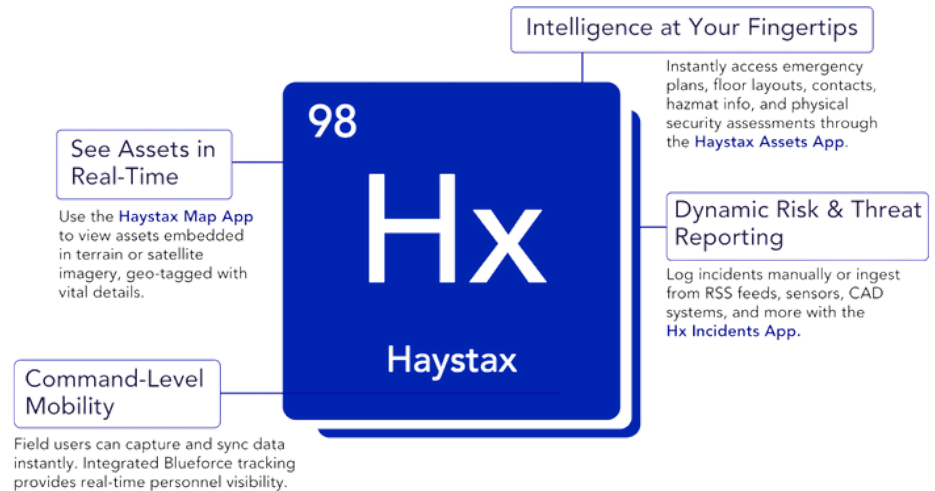

Whether it's a cyber-physical attack on a substation, a mass gathering that turns volatile, or a hurricane barreling toward critical assets, the playbook is the same: limited visibility, delayed alerts, and reactive response. Agencies must act fast with incomplete data—which risks lives, reputation, and resilience.

The Solution

The **Haystax for Public Safety Platform** delivers real-time domain awareness and proactive threat intelligence in a shared environment tailored for multi-agency coordination. The platform unifies asset management, incident tracking, and threat assessment into a centralized command view accessible from the field or the emergency or security operations center. No more scrambling to find a floor plan or emergency contact. No more radio relays or guesswork. Haystax arms you with a living, breathing view of your infrastructure—and the people counting on it.

Key Features & Benefits:

- **Unified Situational Awareness:** Connect all your asset, risk, and incident data into one intelligent ecosystem—always current, always accessible from computer or mobile.
- **Cross-Agency Collaboration:** Break down jurisdictional walls and coordinate seamlessly with law enforcement, emergency managers, utilities, and more.
- **Actionable Threat Intelligence:** Receive real-time alerts from trusted sources and local inputs—filter, prioritize, and act with confidence.
- **Field-to-Center Connectivity:** Stay in sync with mobile users who can submit reports, upload images, and track evolving situations from anywhere.
- **Built for Critical Infrastructure:** Designed to support CIKR sectors with the highest standards for resilience, compliance, and response readiness.

Intelligence at Your Fingertips
Instantly access emergency plans, floor layouts, contacts, hazmat info, and physical security assessments through the **Haystax Assets App**.

See Assets in Real-Time
Use the **Haystax Map App** to view assets embedded in terrain or satellite imagery, geo-tagged with vital details.

Dynamic Risk & Threat Reporting
Log incidents manually or ingest from RSS feeds, sensors, CAD systems, and more with the **Hx Incidents App**.

Command-Level Mobility
Field users can capture and sync data instantly. Integrated Blueforce tracking provides real-time personnel visibility.

About Secure Passage

From the nation's capital to hometown command centers, Secure Passage helps protect the infrastructure that powers daily life.

Whether it's securing a federal facility, safeguarding a regional power grid, or coordinating response at the local level, our platforms deliver the intelligence and operational clarity agencies need—when seconds and decisions matter most.

Trusted coast to coast for high-profile events, disaster response, and day-to-day readiness, we don't just connect data—we connect people to action.

Haystax

CALIFORNIA: Unifying the Golden State's Security Response

For over two decades, Secure Passage has worked side by side with public safety leaders to tackle some of the nation's most complex security challenges. Nowhere is this more evident than in California, where our CalCOP program connects eight of the state's largest population centers—transforming fragmented jurisdictions into a united force with a true common operating picture.

From wildfires and earthquakes to major public events and infrastructure threats, CalCOP enables secure, real-time intelligence sharing and coordinated all-hazard response. Security teams can instantly assess the safety of key assets, respond dynamically to emerging risks, and maintain mission alignment across agencies and regions.

> "The Haystax platform enhances the region's risk analysis processes, critical infrastructure protection activities, and strategic security planning."
>
> — Emergency Manager Director, Public Utility Company

Another official praised the system for "embodying unified situational awareness through continuous partnerships and collaboration." With Haystax, they're no longer reacting in silos—they're operating as one.
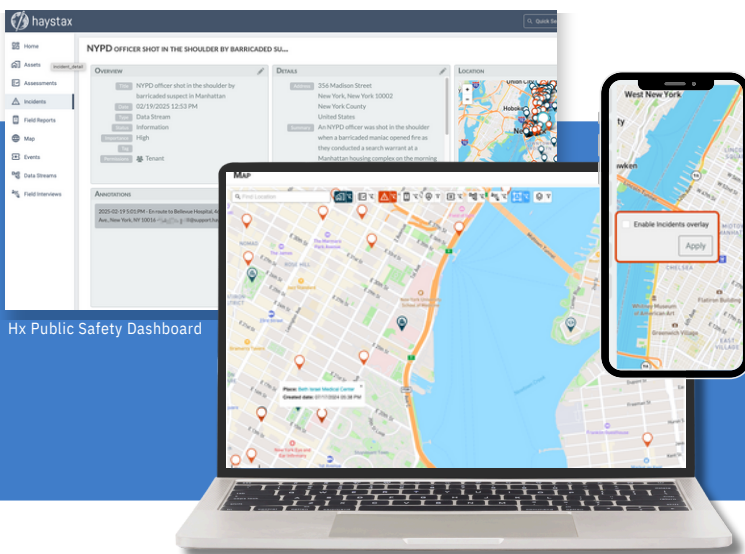

FLORIDA: School Safety at Scale

In the Sunshine State, Haystax helps protect what matters most—2.5 million students across 6,000+ schools—through its intuitive digital assessment tools and real-time emergency response capabilities.

Whether facing a Category 5 hurricane or a man-made crisis, school officials and first responders use Haystax to quickly assess risk, coordinate across agencies, and act with precision—often before traditional alerts even register. With a few clicks, they can access floorplans, emergency plans, threat assessments, and live field updates… all from a smartphone or command center.

URBAN SHIELD: Major Metros Go Operational

From Houston to Boston to Tampa, major U.S. cities use Haystax to track, protect, and monitor area-wide critical infrastructure. Law enforcement and homeland security agencies rely on the platform's rich asset views and dynamic incident mapping to anticipate threats and manage day-to-day security operations. The result? Total asset awareness that drives smarter, faster decisions.

THE HAYSTAX ADVANTAGE

- **Comprehensive:** Maintain full-context awareness of every asset—individually or as a connected network.
- **Dynamic:** Visualize threats, incidents, and planned events as they unfold on a live map or timeline.
- **Expandable:** Ingest external data like CAD calls, wildfires, weather, or sensor feeds—effortlessly.
- **Mobile-Ready:** From handheld to HQ, maintain the same real-time picture, everywhere and always.

Security Starts with Situational Clarity

From federal agencies to local responders, Secure Passage delivers the real-time intelligence and unified command needed to protect the systems that power daily life. We turn complexity into clarity—so you can act faster, smarter, and with total confidence. **Book a demo** today and see Secure Passage in action.
